

R3 is a financial innovation firm that leads a consortium partnership with over 50 of the world's leading financial institutions. R3 works together to design and deliver advanced distributed ledger technologies to the global financial markets.

Quick Facts

- Consortium Member Owned Company (Originally formed as Blockchain Start-Up)
- Consortium financial innovation partnership with over 50 of the world's leading financial institutions
- Led by former ICAP electronic broking CEO David Rutter, R3 is made up of financial industry veterans, technologists, new tech entrepreneurs and subject matter experts, bringing together expertise to rethink and improve the modern financial markets ecosystem
- R3 collaborates with partner institutions like the Hyperledger community on research, experimentation, design and engineering

Current Projects

Corda

A distributed ledger platform for recording and processing financial agreements, designed to implement the vision contained in this document. The Corda platform supports smart contracts, matching the definition of Clack, Bakshi, Braine. Since R3 is a member of the Hyperledger community, R3 is planning to eventually commit Corda to Hyperledger.

Crypto 2.0

Intelligent platform application of cryptographic technology and distributed ledger-based protocols within global financial markets.

R3 Exchanges (Liquidity Exchange)

Innovative new execution solutions which redefine the trading experience for existing and evolving asset classes.

R3 Consortium

R3 has partnered with over 70 financial companies in research and development of blockchain usage in the financial system. Together, these firms lead blockchain technology innovation for the financial service industry.
