

SOLUTIONING GUIDANCE

Blockchain Innovation

GBS Method

IBM Blockchain Innovation adheres to GBS Method Guidance

IBM Blockchain Innovation leverages IBM Garage Method

IBM Blockchain Innovation

 Opportunity
Mgmt

 Solution
Design

 Solution
Delivery

Method will be updated as the Blockchain technologies evolve over time. Foundationally, IBM Blockchain Innovation leverages IBM Garage practices

Delivery Lifecycle

1. Design Thinking

2. Develop POC

- Minimal Scope
- Focus on “idea proofing”
- Rapid PoC (4-6 weeks)
- Internal Team consumption; production grade not required

3. Develop MVP

- Market-ready Scope
- Focus on optimum business functionality coverage
- Buildout in 4-6 months
- Production Release for limited users/months

4. Scale (Continuous enhancements)

- Scale from functional coverage as well as Production grade SLA/SLO coverage
- Buildout over multiple phases in 6-18

Delivery methodology Components

Method & Templates

- IBM Garage Method ++ based with hybrid cloud scenario extensions
- Deliverables and templates
- Project Management Guide
- Normative guidance, Estimation templates/tools

Talent Model & Team

- Team composition – roles, band mix guidance, responsibilities, skill sets
- Agile Squad based delivery model – different types of squads (co-located and remote squads)

Tool Based Delivery

- DevOps toolchain driven model.
- Continuous planning, development, integration, delivery and monitoring
- Code discovery tooling for modernization

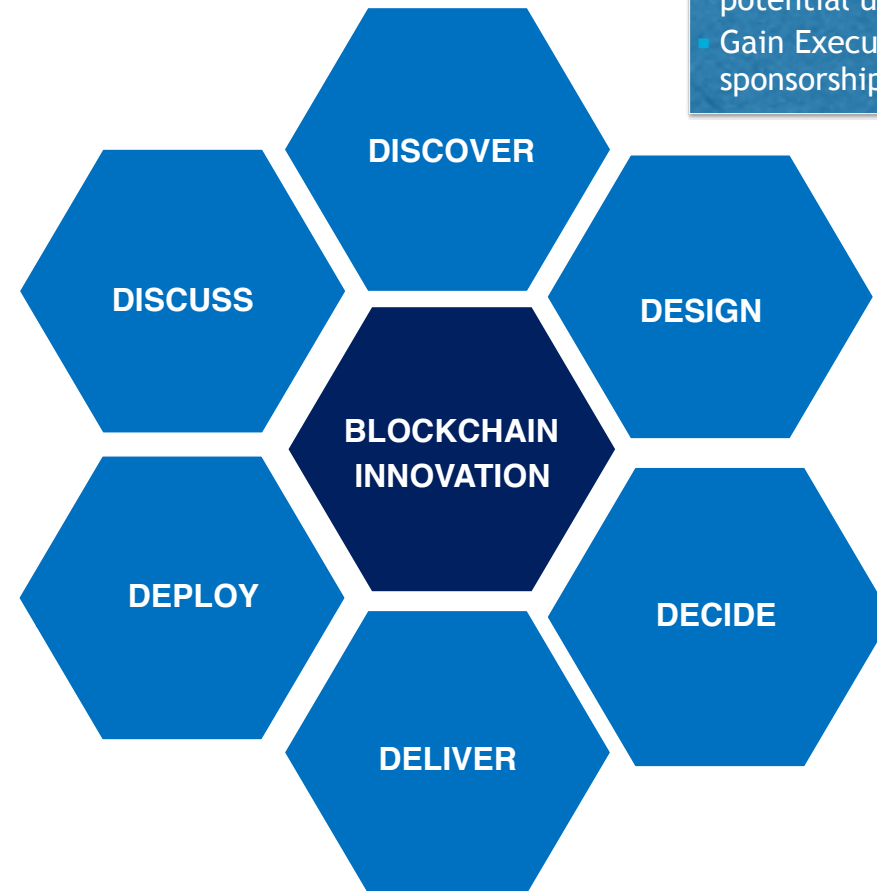

Service Delivery Foundation

- Foundation Technical Services configured for Solution Pattern - , Agile & DevOps, Security, Testing, Solution Operations Center*

IBM Blockchain Innovation

IBM's method for Blockchain provides a practitioner friendly, tool based, light weight approach to deliver applications using Agile principles enabled by automation and DevOps.

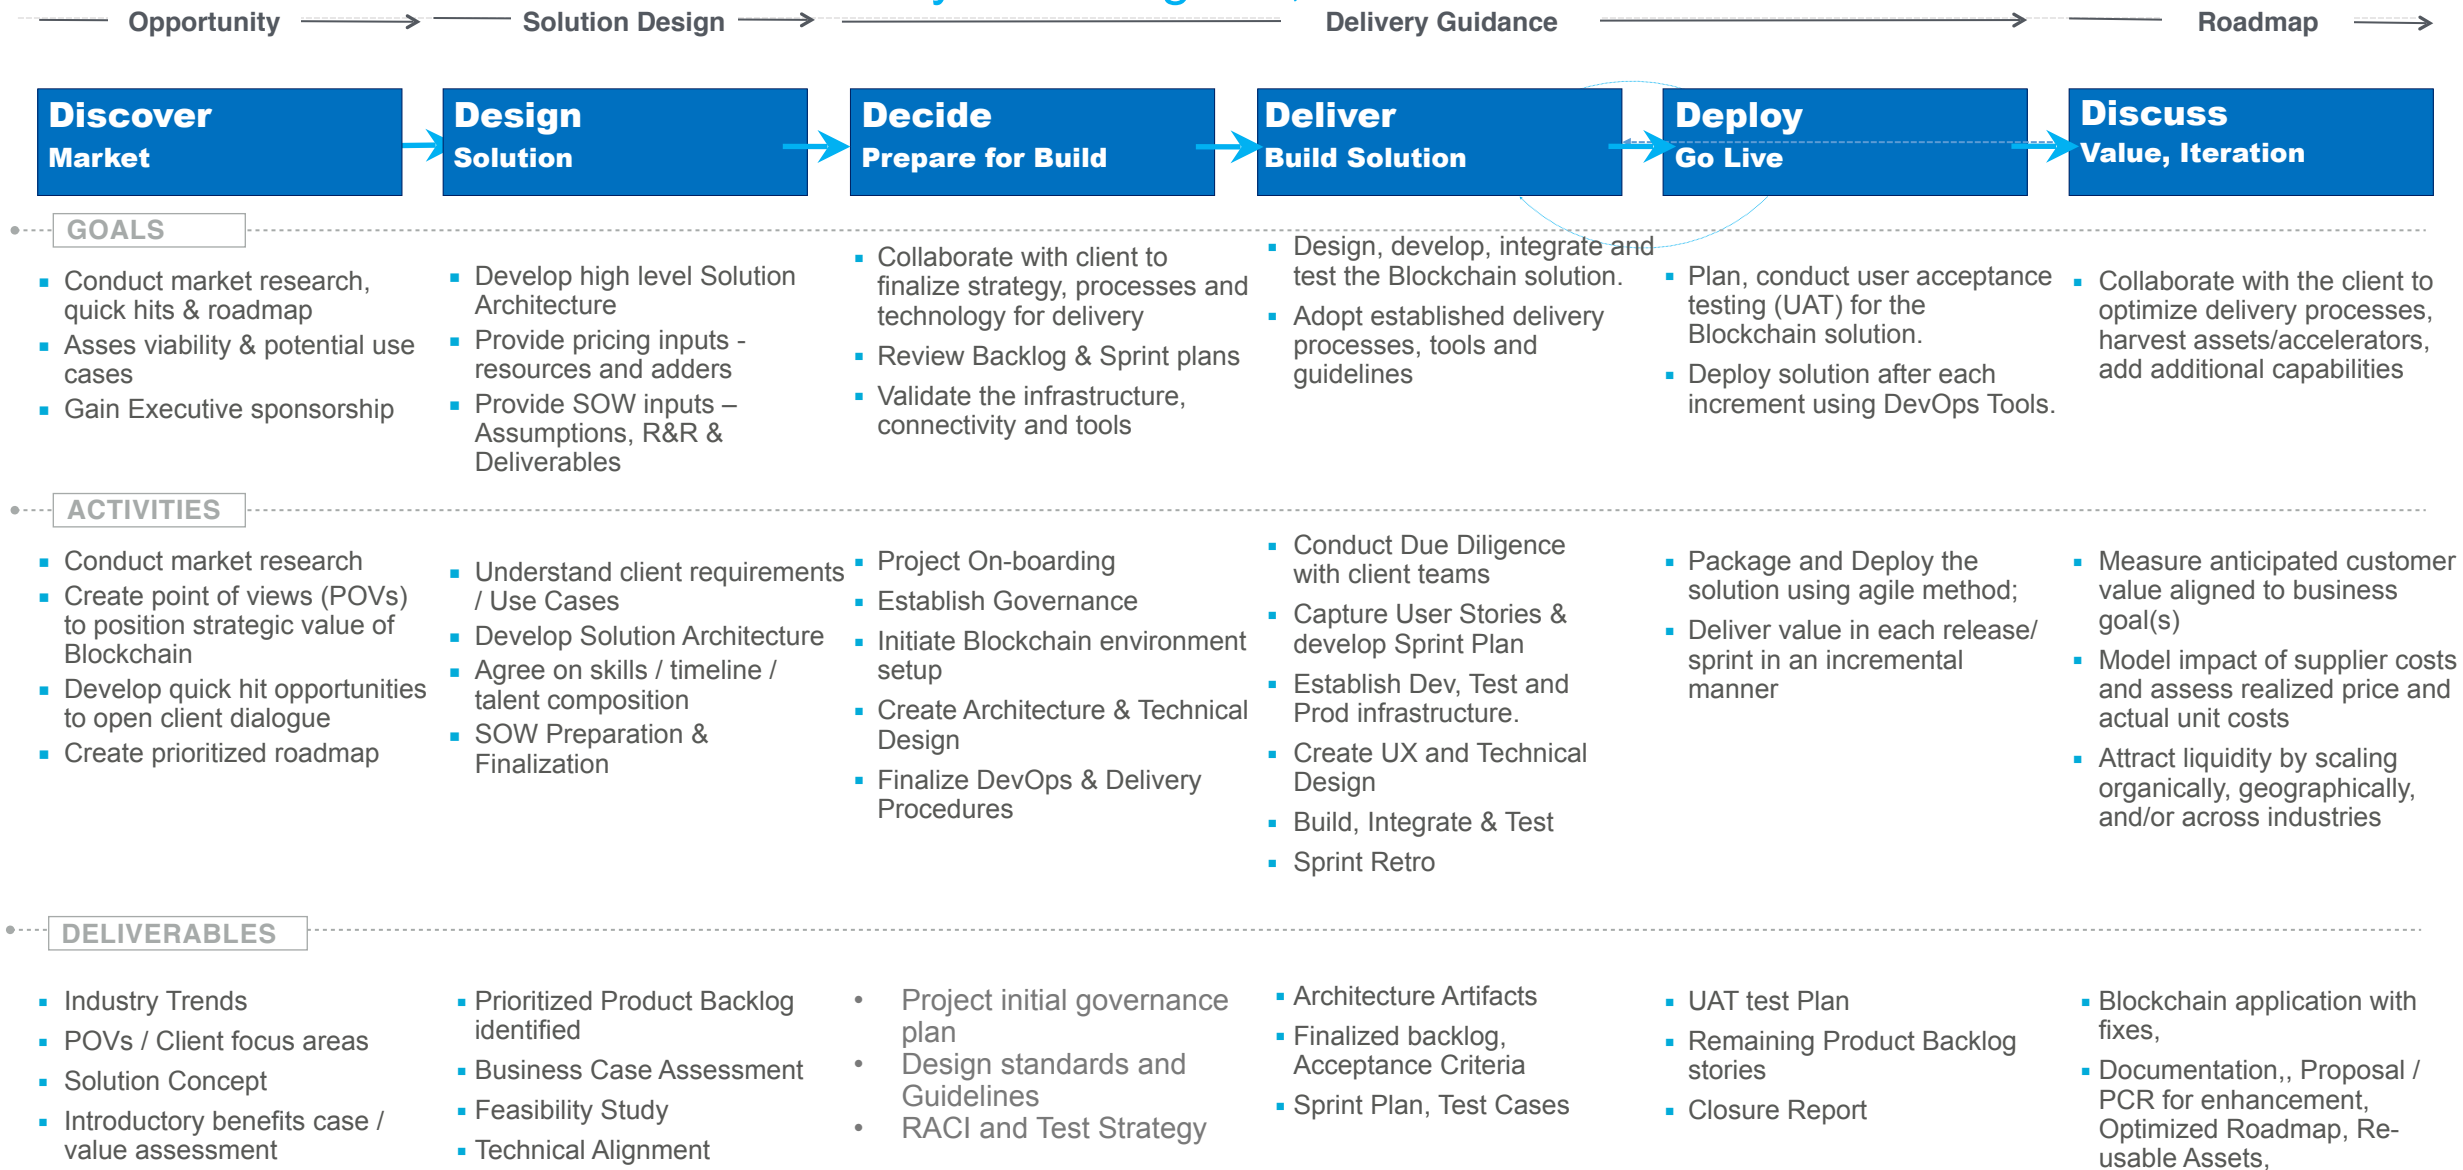

IBM Blockchain Innovation

Solution
Design

Solution
Delivery

IBM Blockchain Innovation has clearly defined goals, activities and Deliverables

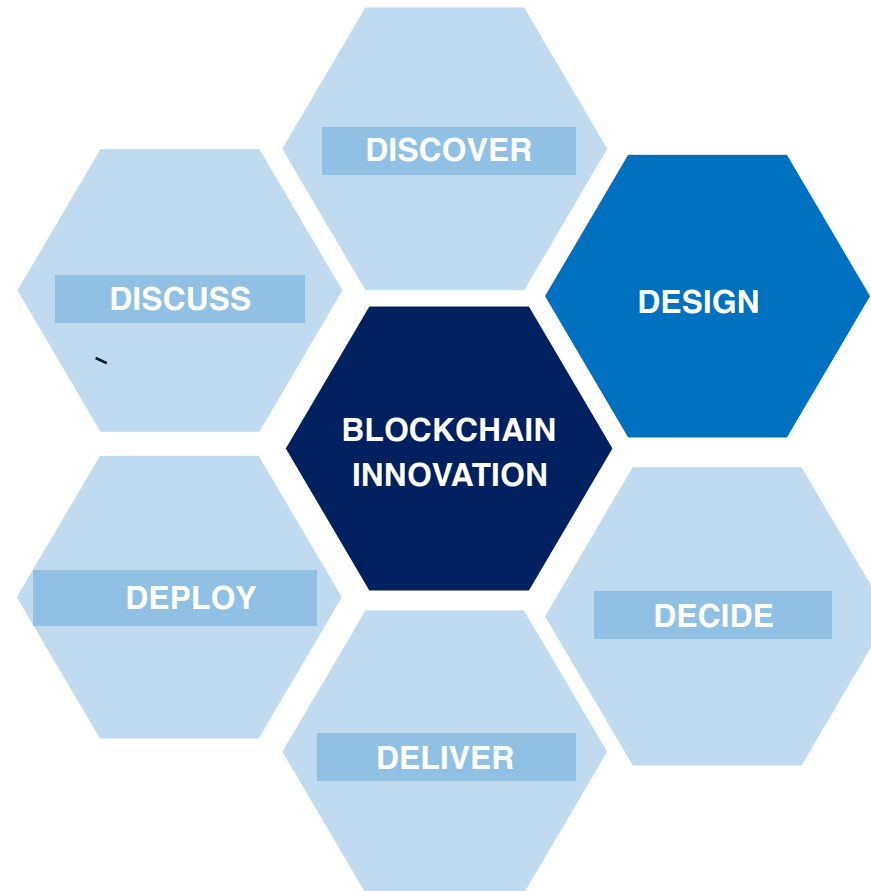

IBM Blockchain Innovation – Solution Design

IBM Blockchain Innovation – Solution Design

IBM Blockchain Innovation provides a practitioner friendly, tool based, light weight approach to deliver applications using Agile principles enabled by automation and DevOps.

IBM Blockchain Innovation

Opportunity
MgmtSolution
DesignSolution
Delivery

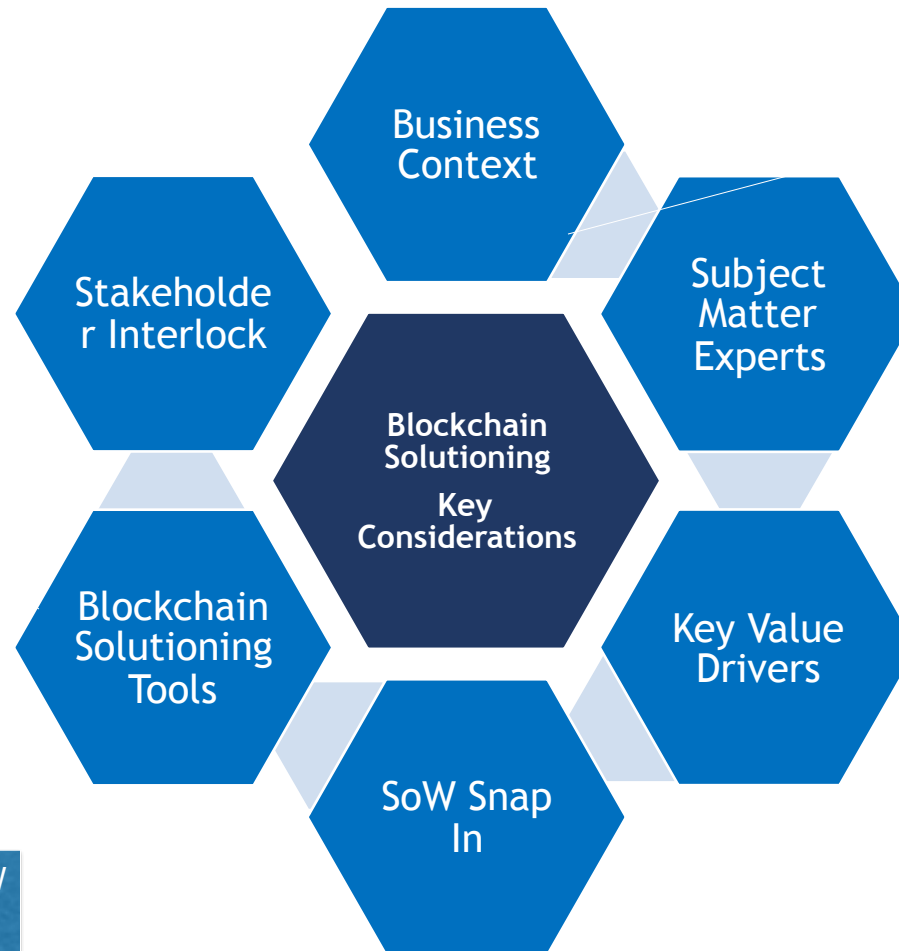

- Develop high level Solution Architecture
- Provide pricing inputs - resources and adders
- Provide SOW inputs – Assumptions, R&R & Deliverables

Blockchain Solutioning involves understanding of requirements and development of response

Establish team structure and communication channels. Publish stakeholder mapping document & workshop timelines.

Maximize use of existing blockchain solutioning tools. This should lead to quick turn around times reduced solution development time.

Prepare the contract using the snap-in SOW and default GPE. Choose from one of the solution options i.e. Standard or Optimum. Avoid being pressured into a fixed scope. This will not help IBM or the client

IBM Blockchain Innovation

**Solution
Design**

Solution
Delivery

Gain clear understanding of customer requirements, pain points, key outcomes & Blockchain value proposition.

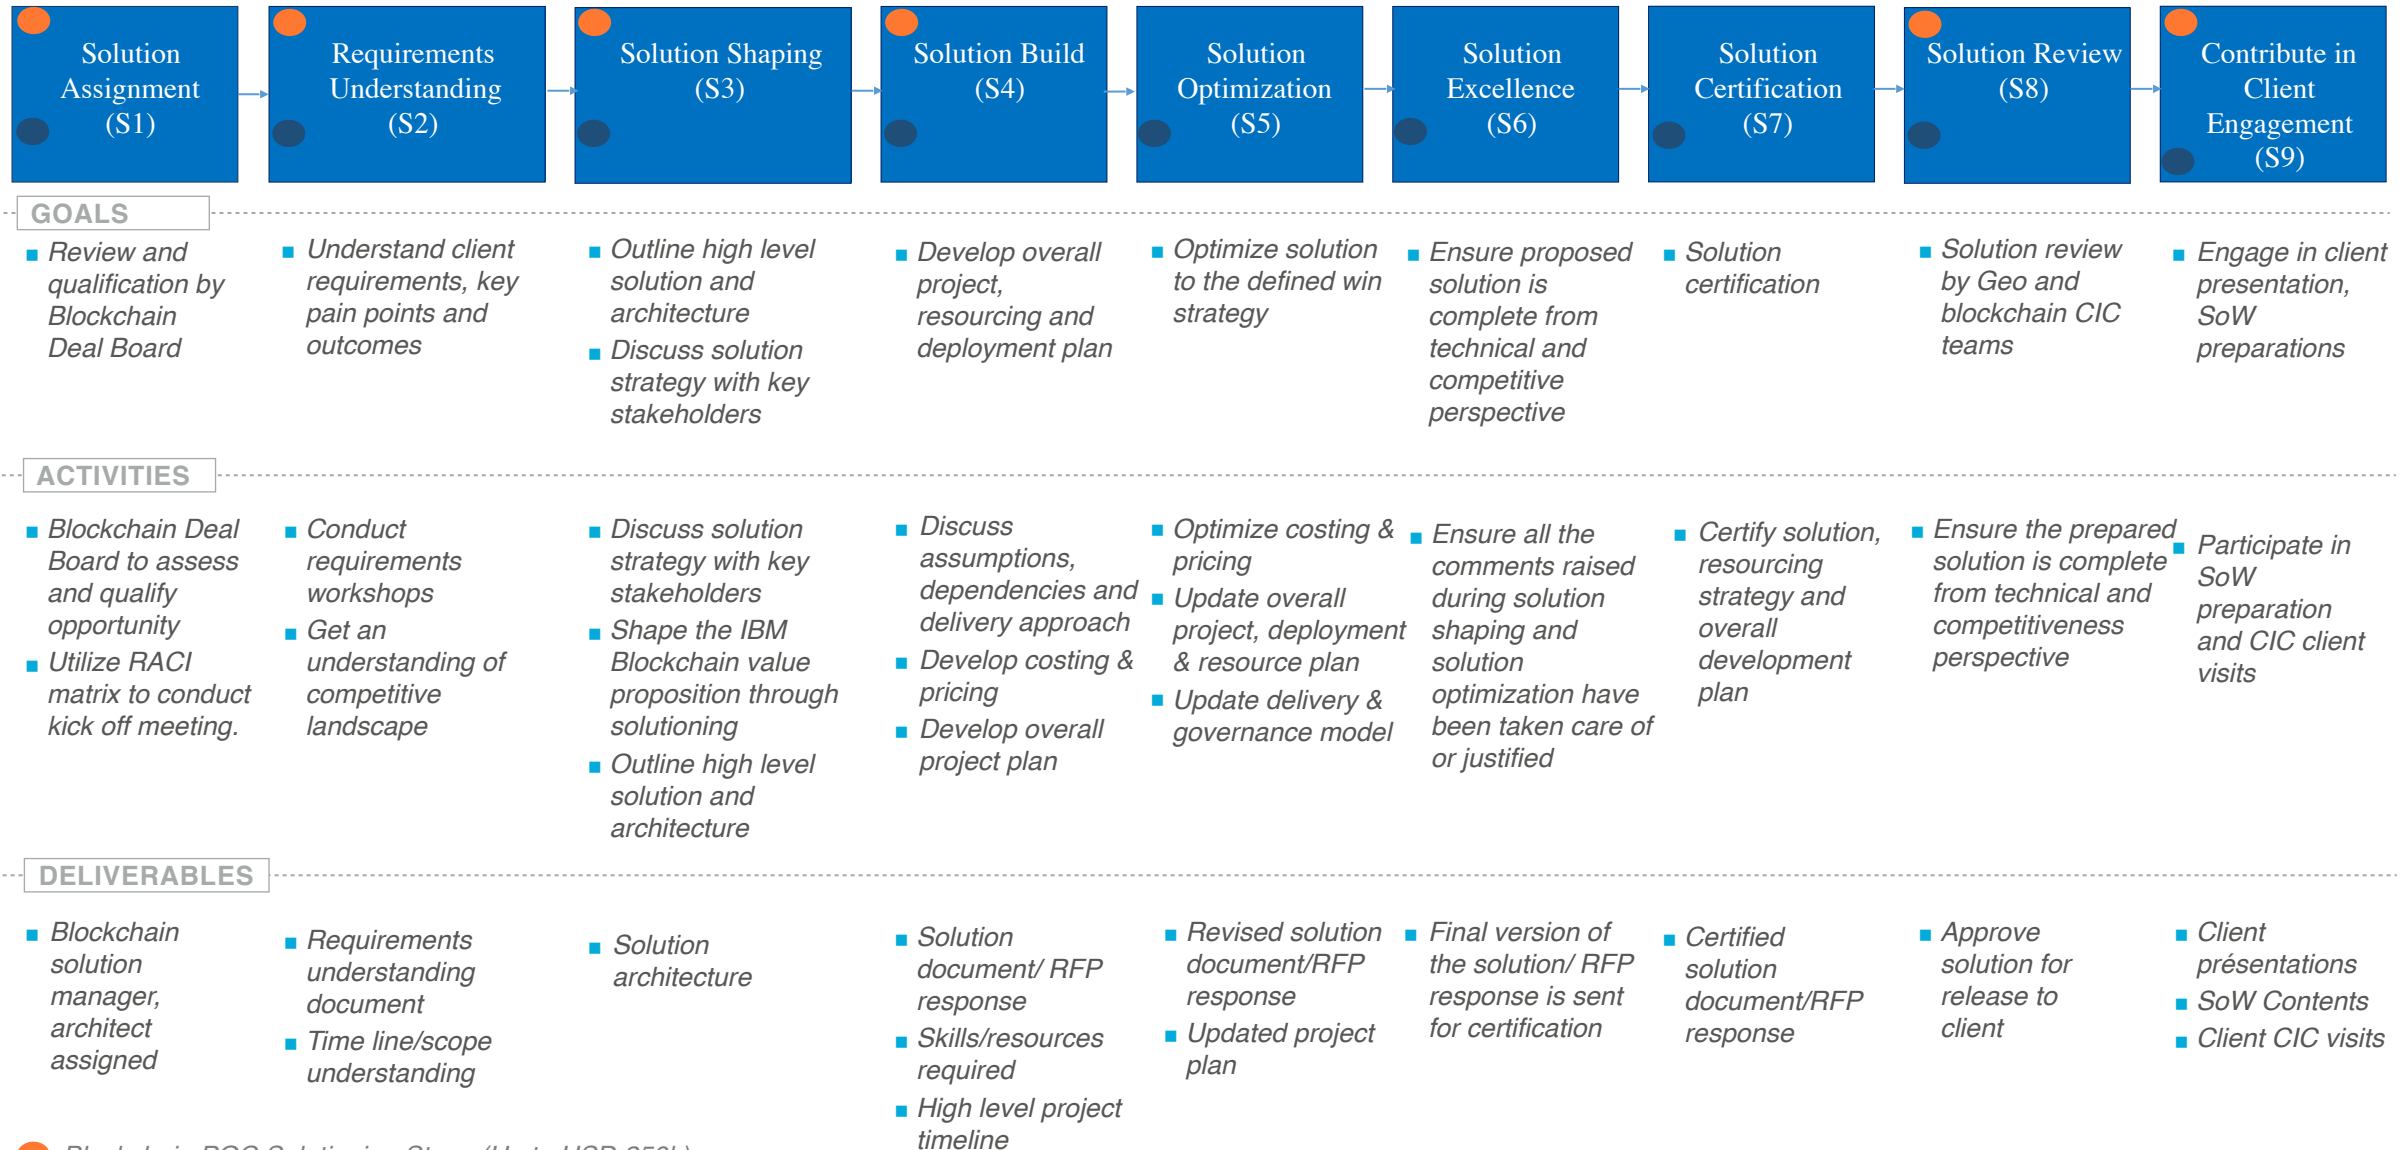

Involve Blockchain experts- strategy, technical & infra consultants; Bluemix experts & Industry consultants, early in the solutioning process.

Leverage key Blockchain value drivers like transparency, security, privacy, automation through smart contracts, provenance & immutability to deliver an impactful Blockchain solution.

- Blockchain POC Solutioning Steps (Up to USD 250k)
- Blockchain MVP Solutioning Steps(up to USD 500k)
- Blockchain @Scale Solutioning Steps (above USD 500k)

Blockchain Solutioning approach provides for iterative development of the solution

● Blockchain POC Solutioning Steps (Up to USD 250k)

10 ● Blockchain MVP Solutioning Steps(up to USD 500k)

● Blockchain @Scale Solutioning Steps (above USD 500k)

Solution Assignment

IBM Blockchain Innovation

Opportunity
MgmtSolution
DesignSolution
Delivery

Solution Assignment (S1)

Activities		Opportunity needs to be qualified as Blockchain deal by the Blockchain deal hub team, prior to solution assignment. Kick off meeting conducted by Blockchain solution manager/ architect
Inputs		Request from opportunity owner for deals qualified by Blockchain deal hub.
Tools		<u>RACI Matrix</u> SET Tool (for deals over USD 1 Mn) <u>https://w3-08.ibm.com/services/gbs/solutions/set/doLogin.wss</u>
Outcomes		Blockchain solution manager/architect assigned. Kick off meeting- Use RACI Matrix
People		Opportunity owner, Blockchain solution manager/architect.

Requirements Understanding

Requirements Understanding (S2)

IBM Blockchain Innovation

Opportunity
MgmtSolution
DesignSolution
Delivery

Activities		Understand client background, client requirements & scope related to - business workflows, infrastructure (bluemix), ledger framework, smart contracts & UX. Understand timelines, competitive situation & key outcomes.
Inputs		Account overview/ account plan from OO Client request (RFP, RFI, RFQ, etc.) Other relevant client material
Tools		Blockchain deal assessment questionnaire Blockchain design consideration questionnaire
Outcomes		Client/scope/timeline/competitive situation understanding Requirements understanding document
People		Opportunity owner, Blockchain solution manager/architect, Blockchain SMEs, Geo client/domain SMEs

Solution Shaping

IBM Blockchain Innovation

Opportunity
MgmtSolution
DesignSolution
Delivery

Solution Shaping (S3)

Activities

Discuss solution strategy with key stakeholders
Shape the IBM Blockchain value proposition through solutioning
Outline high level solution and architecture

Inputs

Deal qualification details
Requirements understanding document
Data on similar previous deals and assets that can be re-used

Tools

NA

Outcomes

Solution architecture

People

Opportunity owner, Blockchain solution manager/architect,
Blockchain practice , Blockchain SMEs, Geo client/domain SMEs

Solution Build

IBM Blockchain Innovation

Opportunity
MgmtSolution
DesignSolution
DeliverySolution
Build
(S4)

Activities

Discuss assumptions, dependencies and delivery approach
 Develop costing and pricing
 Develop overall project, deployment and resource plan

Inputs

Solution architecture
 Client requests (RFI, RFP, RFQ, etc.)
 High level solution strategy

Tools

[Blockchain estimation workbook](#)

Outcomes

Solution document/ RFP response
 Skills/resources required
 High level project timeline

People

Opportunity owner, Blockchain solution manager/architect,
 Blockchain practice , Blockchain SMEs, Geo client/domain SMEs

Solution Optimization

IBM Blockchain Innovation

Opportunity
MgmtSolution
DesignSolution
Delivery

Solution Optimization (S5)

Activities

Optimize solution to the defined win strategy & competitive price point
 Optimize costing & pricing
 Update overall project, deployment & resource plan
 Update delivery & governance model

Inputs

Solution document/ RFP response
 Skills/resources required
 High level project timeline

Tools

[Blockchain estimation workbook](#)

Outcomes

Revised solution document/RFP response
 Updated project plan

People

Opportunity owner, Blockchain solution manager/architect, Geo client/ domain SMEs

Solution Excellence

IBM Blockchain Innovation

Opportunity
MgmtSolution
DesignSolution
Delivery

Solution Excellence (S6)

Activities

Ensure the prepared solution is complete from technical and competitiveness perspective
Ensure all the comments raised during solution shaping and solution optimization have been taken care of or justified

Inputs

Revised solution document/RFP response
Updated project plan

Tools

NA

Outcomes

Final version of the solution/ RFP response is sent for certification

People

Blockchain solution manager/architect

Solution Certification

IBM Blockchain Innovation

Opportunity
Mgmt

Solution
Design

Solution
Delivery

Solution
Certification
(S7)

Activities		Certify solution by checking solution viability, competitiveness and resourcing strategy
Inputs		Revised solution document/RFP response Updated project plan
Tools		NA
Outcomes		Certified solution document/RFP response
People		Blockchain solution manager/architect

Solution review

Solution
Review
(S8)

Activities

Ensure the prepared solution is complete from technical and competitiveness perspective

Ensure all the comments raised during solution shaping and solution optimization have been taken care of or justified

Inputs

Final version of the solution/ RFP response

Tools

Solutioning workbench tool <http://inmbz1181.in.dst.ibm.com/services/swb/prepareShaping.action>

Outcomes

Approve solution for release to client

People

Opportunity owner, Blockchain solution manager/architect,
Solution certifier, Geo reviewer

Contribute in Client Engagement

IBM Blockchain Innovation

Opportunity
MgmtSolution
DesignSolution
Delivery

Contribute in Client Engagement (S9)

Activities		Participate in SoW preparation Participate in client presentations Client CIC visits
Inputs		Proposal inserts Client references and citations Solution document/ RFP response- revised
Tools		Proposal inserts
Outcomes		Client presentations SoW Contents Client CIC visits
People		Opportunity owner, Blockchain solution manager/architect, Blockchain practice , Blockchain SMEs, Geo client/domain SMEs

Proposal Inserts

SoW for Proof of Technology
